## A Simple, Fair, and Market-Friendly Solution that will:

- **SLOW** or **REDUCE** global warming, fossil fuel extraction, ocean acidification, sea level rise, extreme weather, air and water pollution, species migration, water scarcity, climate refugees, energy poverty, gov't bureaucracy...
- **PROMOTE** clean energy, job growth, competition, accountability, innovation, energy & water efficiency, green building, sustainable development, local food networks...
- **PROTECT** our economy, health, national security, middle & low-income households, and South Florida's quality of life

Weekly INTRO call every Wed. 8pm
